**Position Statement of *Pactrol Controls Ltd*
Concerning the EU Directive (2011/65/EU) – RoHS 2 – March 2016**

Dear Sirs,

European Directive 2011/65/EU on the restriction on the use of certain hazardous substances in electrical and electronic equipment, as amended or restated from time to time, (the “RoHS 2 Directive”)

We would like to inform you that the following products delivered to you are [currently] not directly subject to the requirements under the RoHS 2 Directive:

We believe that the products are

1. not electrical or electronic equipment (EEE) in terms of the RoHS 2 Directive but rather components and therefore not covered by the scope of the RoHS 2 Directive,
2. They are used in appliances that are currently not classed as being EEE in terms of RoHS 2 as the primary energy source is gas or oil.

However, we are aware of the fact that our customers require products meeting the substance requirements laid down in the RoHS 2 Directive and on the basis of declarations we received from our suppliers as to the maximum concentration values in respect of their products, we are pleased to declare that the products supplied to you meet those substance requirements as of today.

Should you have any questions regarding the application of these Directives and how they may affect your transactions with *Pactrol Controls Limited*, please contact your usual contact in the first instance or *David Beeston* (dave.beeston@emerson.com) who is the RoHS champion for Pactrol Controls Limited.
